PRECEDING GOLDEN JUBILEE  
10 TO 15 DAYS.

Members American Association of Nurserymen. All quotations, prices, contracts and grading, both for purchase or sale, are based on horticultural standards adopted by this Association June, 1923. All quotations are for immediate acceptance subject to stock being sold and without liability to us should injury befall the stock from frost, flood, hail, fire or other causes beyond our control.

# THE NEW DEVVOE PEAR

PLANT PAT.  
NO. 728

WE ANNOUNCE THE INTRODUCTION OF THIS NEW  
BLIGHT RESISTANT AND DISEASE RESISTANT  
PEAR WHICH GIVES PROMISE OF RESTORING COMMERCIAL  
PEAR PRODUCTION IN THE EASTERN AND  
CENTRAL STATES.

HISTORY:- Originated as a chance seedling  
in orchards of Greiner Bros., Marlboro,  
Ulster County, New York. The seedling, found  
growing in a rocky section of their or-  
chards in 1924 attracted their attention  
because of its unusual vigor. The original  
tree still stands, producing good crops, even  
the other varieties in the same section of  
the orchard have blighted and died. Mr.  
Greiner has top-worked many of his trees  
to DEVVOE and young 4 year old trees on  
Bartlett seedling roots bore their first  
crop this year (1947) and to his knowledge  
there has never been any blight in any of  
the DEVVOE trees. Mr. Greiner picked 3 1/2  
bushels of DEVVOE pears from 5 year old  
grafts set on a Seckel pear tree. It is  
not unusual to see from 3 to 5 ft. of growth  
on Devvoe trees, the foliage remaining on  
trees until late in fall.

"FIRST TREES READY FOR DELIVERY FALL 1948, MAKE RESERVATIONS FOR DEVVOE TREES SOON"

THESE ARE ACTUAL SIZE DRAWINGS OF TWO  
DEVVOE PEARS PICKED IN SEPTEMBER 1947.  
The shape will vary as the drawings  
illustrate, making a beautiful pack in  
either boxes or baskets. THE FRUITS OF  
DEVVOE HANG WELL AT RIPENING TIME, ARE VERY  
UNIFORM AND LARGE IN SIZE. We have never  
seen any pear variety have the ability to  
size a heavy crop of fruit like DEVVOE does.  
We suppose this is due to the vigorous  
tree and foliage characteristics. DEVVOE  
fruits have an attractive blush, with green  
background at picking time, coloring a  
beautiful golden yellow under proper  
storage, as the pear ripens. Quality is  
good to very good, slightly more acid  
than Bartlett. Devvoe will keep until  
March in cold storage. Foliage has a hard  
surface and resists "pear psylla" well.

"THIS IS ANOTHER EXCLUSIVE BOUNTIFUL  
RIDGE INTRODUCTION. TREES GROWN AND FOR  
SALE ONLY BY BOUNTIFUL RIDGE NURSERIES."

April 26, 1948

Margaret C. Schindler, Chief  
Division of Bibliography  
U.S. Dept. of Agriculture Library  
Washington 25, D.C.

Dear Madam:

Please find enclosed a special bulletin on the Devco pear. We trust there will be further information on this new fruit for fall of '48.

Very truly yours,

BOUNTIFUL RIDGE NURSERIES
